

Can you afford to fail a transportation audit?

Regardless of your industry, driver, or fleet size, all vehicles involved in interstate travel with a gross vehicle weight rating (GVWR) or combination weight of more than 10,000 lbs. are subject to Federal Motor Carrier Safety Regulations (FMCSR).

Companies operating solely in intrastate commerce are subject to applicable state regulations.

The U.S. Department of Transportation (DOT) regularly audits motor carriers to ensure they comply with regulations. Attention to detail and thorough record keeping are the keys to making sure that your business passes each and every safety audit by the DOT.

Frequently found transportation mistakes...

- Not establishing driver files for non-CDL operators
- Supervisors lacking required 2-hours of drug & alcohol education
- Poor support for documenting accurate hours of service
- Unaware of CSA scores and how it affects your business assets
- Insufficient fleet maintenance procedures

Contact us today to schedule your DOT mock audit that will leave you with a report full of findings, NOT FINES.
